

# CRH Canada

Since 1912, CRH Canada has operated a diverse and complementary offer of services and businesses across the country. Through a range of services and products adapted to the realities and needs of Canadians, CRH Canada has evolved over the years to carve out an important place among the largest construction and materials companies in the country. CRH Canada can meet your cement, aggregate, concrete, asphalt, architectural and industrial product or construction needs, whether it's the products that form the backbone of our modern infrastructure or the services that help build places that bring our cities and communities to life.

## YOUR CHALLENGES. OUR SOLUTIONS.

### Ash Grove Cement

Ash Grove Cement has been a trusted supplier in Ontario for decades, operating its key Mississauga plant to serve the province's diverse construction needs. Committed to sustainability, Ash Grove leads innovation with initiatives like the Carbon 1 Mississauga carbon capture and Carbon Upcycling partnership projects, reducing emissions and advancing eco-friendly cement production. Focused on quality, safety and environmental stewardship, Ash Grove is essential in supporting Ontario's infrastructure development by providing cement that builds stronger, greener and more resilient communities for the future.

### Dufferin Aggregates

Dufferin Aggregates supplies high-quality crushed stone, sand, gravel, and recycled materials across Ontario for a wide range of projects. Their products support major infrastructure developments, residential and commercial construction, road building and landscaping applications. Operating more than 20 sites, including quarries and distribution yards, Dufferin Aggregates is committed to sustainable sourcing and innovation, helping to build strong, durable foundations for communities throughout the province.

### Dufferin Asphalt

Dufferin Asphalt supplies high-quality asphalt solutions across Ontario for projects of every scale; from residential driveways and commercial parking lots to major highways and airport infrastructure. Our mixes are engineered for durability, ease of application, and long-term performance, meeting the demands of both everyday paving and complex civil builds. With a strong commitment to sustainability, we incorporate recycled materials, warm-mix technologies, and energy-efficient production methods. Backed by a focus on safety and customer satisfaction, Dufferin Asphalt delivers reliable products that help build resilient, lasting infrastructure.

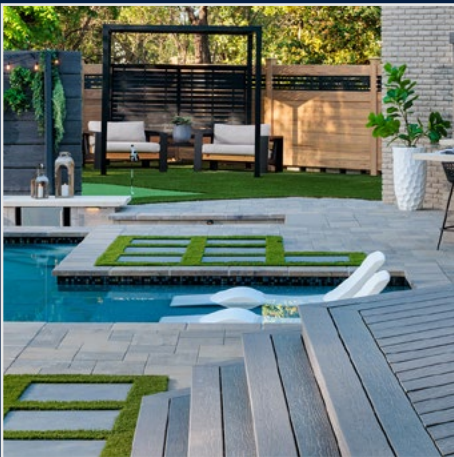

## Dufferin Concrete and Ontario Redimix

Ontario Redimix and Dufferin Concrete together form a powerhouse in Ontario's ready-mix concrete market, operating over 30 plants and a fleet of well over 400 trucks. Serving residential, commercial and infrastructure projects of all sizes across Southern Ontario, they deliver high quality, innovative concrete solutions like sustainable, low-carbon and mobile plant options with unmatched reliability. Committed to safety, sustainability and customer satisfaction, Ontario Redimix and Dufferin Concrete provide the strong foundation builders trust to shape communities and drive Ontario's construction growth.

## Dufferin Construction

Dufferin Construction is one of Canada's established and trusted civil infrastructure contractors, known for delivering high-quality projects and solutions across transportation, commercial and industrial market segments for over 100 years. From highways and bridges to site development, transit, municipal construction and largescale airport expansion, Dufferin combines expertise, cutting-edge technology and a commitment to sustainability to successfully approach and deliver every project. Backed by skilled project teams and cutting-edge technology, Dufferin is shaping tomorrow's infrastructure today.

## Oldcastle Architectural Products Group (APG)

Oldcastle APG is a leading provider of comprehensive outdoor living solutions across Canada. Through its brands like Belgard, Echelon, Permacon and Techniseal, APG delivers a broad portfolio of hardscape and masonry products including stone and brick veneers, architectural masonry, commercial hardscape, segmented retaining walls and slab systems for roof terraces. These solutions are engineered for long term durability, design versatility and efficient installation across industrial, commercial, institutional and residential projects.

Complementing its masonry and hardscape offering, Oldcastle APG also operates a robust fence, rail and deck business through brands such as MoistureShield Composite Decking, Catalyst Fence Solutions and RDI Railing. This portfolio includes vinyl and aluminum fencing, advanced composite decking and code compliant railing systems designed to provide secure, attractive and low maintenance outdoor environments. Together, these integrated product lines position Oldcastle APG as a single source partner for enhancing and protecting outdoor spaces nationwide.

## Oldcastle Infrastructure Products Group (IPG)

Oldcastle IPG provides engineered solutions for the Water, Communications, Energy, Rail and Transportation markets. Our portfolio includes a complete line of proprietary stormwater detention, retention, infiltration, treatment and harvesting systems, along with custom precast drainage and conveyance products delivered through our First Defense, Downstream Defender, Hydro Brake and StormCapture technologies.

To support and protect underground cable pathways, we offer Plastibeton channel systems, Duralite and STAKKabox ground level vaults, MultiDuct engineered duct banks and Primex fiber optic termination solutions for FTTH deployments.

For rail and transit applications, our precast StarTrack product line provides durable, low maintenance grade crossing systems and industry adjacent products such as drip tracks, conveyor and unloading pits and containment pits engineered for long term performance under heavy traffic loads. StarTrack solutions integrate seamlessly with existing track infrastructure, offering accelerated installation, improved safety and reduced lifecycle costs for rail operators and municipalities.
